AFTER-CARE INSTRUCTIONS

Congratulations on your new brows!

Please read the After-Care instructions carefully and in their entirety.

Your after-care is imperative to maintaining lasting results. It is up to you to make sure your brows last! Remember, our skin is a living organ that needs nourishment and proper care.

Follow these steps to maintain the best retention and results.

Immediately after leaving the studio:

Your brows will feel tender and look darker than anticipated. There may be some stinging, swelling, slight burning or itching- this is normal and will take a few hours to settle.

Make sure your hands, glasses, and anything possibly touching your face are wiped clean of bacteria to prevent getting an infection.

DO NOT TOUCH your beautiful new brows!

It is essential that you resist the urge to touch or scratch the treated area. If itching does occur, gently tap or slap the source, but DO NOT scratch, pick or rub the area.

The day of the treatment: Absorb

After the procedure, gently blot the area with clean tissue to absorb excess lymph fluid. Do this every 5 minutes for the full day until the oozing has stopped. Removing this fluid prevents hardening of the lymphatic fluids ensuring more pigment retention.

Days 1-7: Wash

Wash daily to remove bacteria, build up of product and oils, and dead skin. (Don't worry, this does not remove the pigment!)

Gently splash your eyebrows each morning and night with water and gentle antibacterial soap like, Cetaphil, or Neutrogena. With a very light touch, use your fingertips to gently cleanse the eyebrows. Gently pat the area and rinse with water ensuring that all soap is rinsed away. To dry, gently pat with a clean tissue. **DO NOT** rub your brows. **DO NOT** use any cleansing products containing acids (glycolic, lactic, or AHA), or exfoliants.

Days 1-7: Moisturize

Apply a rice grain amount of aftercare ointment (Vaseline or Bepanten) with a cotton swab and spread it across the treated area. Be sure not to over-apply, as this will suffocate your skin and delay healing. The ointment should be barely noticeable on the skin. **NEVER** put the ointment on a wet or damp tattoo.

Days 7-14:

Your After-Care schedule is over, but your brows are still healing. Continue to treat your brows as a wound (no bacteria, touching, make-up, etc.). Please read important reminders for important continuous after-care.

SHOWER: You can shower, but do not allow the water on your face. Limit your showers to 5 minutes and leave bathroom door open while showering to reduce steam. Steam will open your pores and release the pigment.

MAKE-UP: Makeup cannot be worn on the brows for 14 days. If you choose to wear foundation, completely avoid the brow area. Makeup is full of bacteria and can cause infection.

CREAMS AND SERUMS: No moisturizer or creams (besides after-care cream) can be applied during the 14-day healing process.

IT IS ITCHY: No picking or scratching.

HAIR: Keep your hair out of your face. Tie it up.

I NEED A TAN: Avoid saunas, hot tubs, sun exposure. Wear a hat if you have to.

Please follow these directions exactly. Deviation from these After-Care steps may cause irreversible trauma and scarring to the area.

If you have any questions regarding after-care please contact the studio.
